

# DID YOU KNOW?

UP TO

90%

...of car seats materials are recyclable!  
That's at least 160 tonnes that could be saved from New Zealand landfills each year.

2%

## HARNESSES & STRAPS

Used in the production of bags made from recycled products.

6%

## FABRIC & PADDING

Currently sent to landfill. We're always looking at new ways to recycle or repurpose these materials.

12%

80%

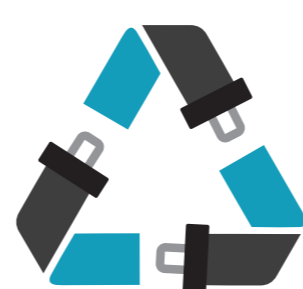

## METAL PARTS

Recycled through scrap metal merchants - wide variety of end uses.

## PLASTIC FRAMES & BASES

Recycled into products used in the building industry like plastic caps for steel reinforcing bars used in concrete slab construction
