

DID YOU KNOW?

UP TO

90%

...of car seats materials are recyclable!
That's at least 160 tonnes that could be saved from New Zealand landfills each year.

2%

HARNESSES & STRAPS

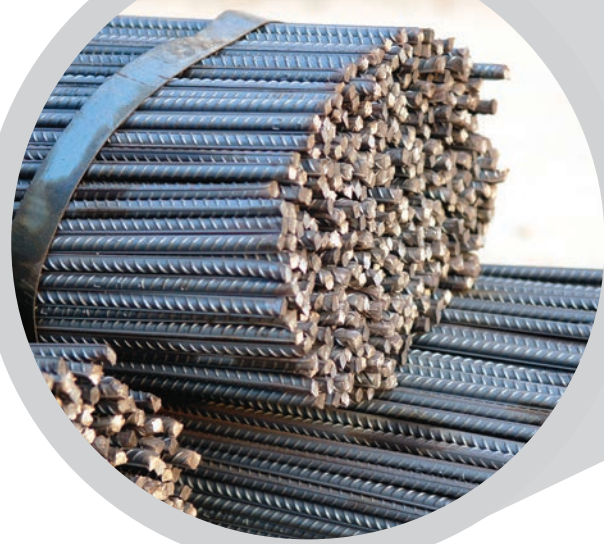

Used in the production of bags made from recycled products.

6%

FABRIC & PADDING

Currently sent to landfill. We're always looking at new ways to recycle or repurpose these materials.

12%

METAL PARTS

Recycled through scrap metal merchants - wide variety of end uses.

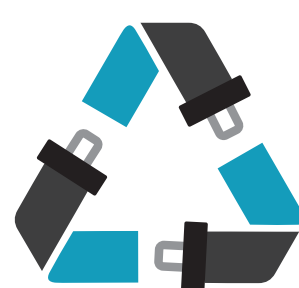

80%

PLASTIC

The majority is recycled into products used in the building industry like plastic caps for steel reinforcing bars used in concrete slab construction
